

BUILDING A ROADMAP FOR E- ASSESSMENT

Helen Beetham

Building a Roadmap for e-Assessment

Helen Beetham
Helen.Beetham@Bristol.ac.uk

This session will be led by Helen Beetham, Consultant to the JISC e-Learning Programme.

JISC in consultation with the community and strategic partners, is developing a Roadmap for e-Assessment for post-16 and HE sectors. The roadmap will include a timetable of strategic and policy developments for e-assessment over the next few years and identify resulting implications for institutions. The roadmap is being produced in conjunction with an e-assessment glossary. The primary audience for Roadmap will be senior managers and practitioners in institutions in the post-16 and HE sectors, with the secondary audience being the key stakeholders including funding councils, regulatory bodies (including QCA, SQA and inspectorates) and examination boards and accrediting bodies.

This session will explore the issues in developing a roadmap for e-assessment and participants will have the opportunity to contribute to the development of the roadmap.
